Taxation of fund income	5% of the profit of the Fund.
Taxation of shareholders - natural persons	15% for redemption in up to 3 years, 0% for redemption after 3 years, withholding tax on paid dividend 15%.

II. Objectives of the Fund

Preferential share
of profit for investors is

9 - 10% p.a.

after taxation, according
to the type of investment
shares

The Fund issues 3 types of investment shares, with the obligation to buy from investors:

For qualified investors from among the general public:

- priority investment shares,
- dividend investment shares.

The founders subscribe:

- performance investment shares (their capital serves to ensure a minimum return for other types of shares).

The **r2p invest SICAV, a.s.** fund was established with the aim of maximizing the value of the funds of investors - shareholders of the fund, in the form of direct and indirect investments in loans and receivables, especially in the territory of Central Europe, Southeast Asia and South America.

The set goal is primarily achieved by:

- the purchase of equity investments in trade companies operating in the territory Central Europe, Southeast Asia and South America that provide financial services and purchase receivables,
- lending to these companies to purchase both secured and unsecured portfolios receivables and their administration, primarily from local financial institutions,
- lending to these companies for both secured and unsecured loans and local market loans for the purchase of NPL portfolios,
- interest received on loans granted, dividends received from subsidiaries; and potentially to profit from the sale of equity investments.

The fund's investments are designed as medium to long-term, so it is particularly suitable for investors with an investment horizon of 4 years.

III. Benefits of Investing Through a Qualified Investors Fund

- Professional management of equity and loans.
- Low entry fees.
- Zero exit fees for a 3-year holding period.
- Lower 5% income tax rate for investment funds.
- Possibility of exemption from income tax for investors when purchasing investment shares after 3 years.
- Regular quarterly payment of a dividend advance in the amount of minimum returns (9% p.a.) for investors in dividend investment shares (subject to withholding tax of 15%).
- Higher portfolio diversification.
- Portfolio size increases the manager's negotiating position.
- Possibility to finance part of the portfolio by bank loan or by issuing bonds - the leverage will not exceed 300% of the fund's capital.
- Information on the risks associated with investing are contained in the fund rules and KID.

IV. Reasons for Investing in the Fund

- Fund capital exceeding 1.3 billion CZK
- Above-standard expected return on preference and dividend investment shares of up to 10% p.a.
- Priority share in the fund's profit of up to 10% p.a. (relative to the fund founder - holding performance investment shares).
- Provision of a minimum return on preferred investment shares of 9% p.a., even in the case of a lower profit or loss of the fund. The minimum yield allows the redistribution of fund capital from holders of performance and investment shares (founders of the fund) in favor of holders of preference and dividend investment shares (external investors), up to the amount of such fund capital which is attributable to performance investment shares.
- Secondary share of the potential loss of the fund. The loss is primarily covered by the fund's capital, from the holders of performance investment shares.
- Investing in real assets with stable value growth. Professionally managed loans and receivables represent a stable and estimable return in the form of principal and interest received.
- Professional background of the Fund manager that cooperates with an investment group that has a long-term international experience in lending and receivables management and purchase.
- Diversification of investments into more geographic territories.
- Own resources 1 240 470 496 CZK

V. Investment Strategy and Process

The investment strategy of r2p invest SICAV, a.s. is to maximize risk spread by diversifying investments into companies that buy and manage receivables or provide loans and credit, . The fund reinvests the proceeds of the fund's assets.

The investment process has several phases:

- Selection of suitable investments.
- Submission of proposals to the fund's investment committee, together with a proposal of the required price and quality parameters.
- Approval of the plan by the fund's investment committee.
- Realization of investments..

Investment process criteria:

- a) Acquisition of a company (SPV)
The investment committee always requires detailed financial criteria for the investment's effectiveness.
One of the most important criteria is "investment cash flows".
- b) Purchases of portfolios of secured and unsecured receivables
A precise analysis of return on investment is crucial, together with the overall potential of the portfolio.
- c) Lending to companies
Sufficient collateral is crucial for the investment committee to approve the credit risk.

The fund relies on the truly extensive and long-term experience of the Fund founder in the target markets in all three investment areas. Detailed information on the investment strategy and process is provided in the statutes of the fund.
